

SATIS PUBLIC BRAND ASSETS AND USAGE GUIDE

Public Brand Assets and Usage Guide

SATIS Investment, SAUSD and SAEUR - Official Brand and Presentation Control

DOCUMENT STATUS

FINAL APPROVED PUBLIC EDITION. The public copy contains no approver names, signatures, stamps or personal/professional identifiers.

Field	Value
Document identifier	SATIS-BA-EN-001-P
Version	v1.0-EN
Document date	20 July 2026
Subject	Public brand assets of SATIS Investment, SAUSD and SAEUR; shared official token emblem; trademark-procedure status; permitted and prohibited use
Document type	Final public document
Publication status	PUBLIC - APPROVED
Document owner	SATIS Investment
Official domain	satisinvestment.com
Media contact	media@satisinvestment.com

Approval does not grant any third party automatic partnership, representation, commercial or token-issuance rights.

DOCUMENT CONTROL

Field	Value
Document title	SATIS Public Brand Assets and Usage Guide
Hungarian title	Public Brand Assets and Usage Guide
Document identifier	SATIS-BA-EN-001-P
Hungarian public identifier	SATIS-BA-EN-001-P
Hungarian internal identifier	SATIS-BA-EN-001-I
English public identifier	SATIS-BA-EN-001-P
English internal identifier	SATIS-BA-EN-001-I
Master-language version	Hungarian
Review cycle	event-driven and at least annually
Related documents	Official Summary; Token Summaries; Risk Notice; On-chain Verification Sheet; Terms of Use
Trademark-procedure status	Successfully submitted; the HIPO procedure is in progress. Case number: M2602698. No registered status exists yet.

VERSION HISTORY

Version	Date	Description	Status
v1.0-EN-APR1	20 July 2026	First complete Hungarian approval draft	reviewed
v1.0-EN	20 July 2026	First final edition approved in all four approval areas	final

KEY STATUS STATEMENT

A brand asset alone does not prove token identity, partnership or official representation. The Ethereum Mainnet network and the full official contract address must also match to verify SAUSD or SAEUR.

1. PURPOSE AND SCOPE OF THE DOCUMENT

The purpose of this document is to establish consistent, citable and verifiable rules for the public presentation, distribution and third-party use of the SATIS Investment project logo, the SATIS emblem and the official token emblem jointly used by SAUSD and SAEUR.

- defines the scope of approved public brand assets;
- separates public exports from internal editable and source files;
- records permitted and prohibited uses;
- requires the token emblem and on-chain identification to be handled together;
- defines file-naming, versioning, packaging and SHA-256 integrity rules.

2. EXECUTIVE SUMMARY

The current public core of the SATIS Investment brand system consists of three identification levels: the SATIS Investment project brand, SAUSD token identification and SAEUR token identification. Both tokens use the same official token emblem; they are distinguished by their official name, symbol, network and full contract address. The system is intended to ensure consistent institutional presentation, platform and media compatibility, and reduced risk of false or misleading brand use.

Files published publicly must be approved exports only. Internal working files, editing histories, layered graphic sources, unapproved alternatives, signatures, stamps or personal identifiers must not be included in the web package.

TRADEMARK-APPLICATION STATUS - SUCCESSFULLY SUBMITTED, PROCEDURE IN PROGRESS
According to the confirmation issued by the Hungarian Intellectual Property Office (HIPO), the trademark application was successfully submitted on 20 July 2026. Case number: M2602698; filing reference: IÜF/62437-1/2026; receipt reference: SZTNH_EBEJ-20260720-14491.

The application concerns the official SATIS emblem specified in this guide. Successful submission is not registration; this document does not claim registered-trademark status.

3. CURRENT BRAND ARCHITECTURE

Level	Brand asset	Current role	Public status
1.	Official SATIS emblem / figurative mark	Interlocking deep-navy and silver-grey diagonal ribbon elements with white negative space forming part of the composition. Subject of the trademark application.	Only from an approved master file; geometry, proportion and colour may not be modified.
2.	SATIS Investment horizontal composite logo	Combination of the official emblem and the SATIS Investment wordmark; the project's full institutional identifier.	Only from an approved export; the wordmark may not be retyped.
3.	SAUSD token identification	The official emblem with the SAUSD name, symbol, Ethereum Mainnet network and full contract address.	From the same SVG master; only with SAUSD data.
4.	SAEUR token identification	The official emblem with the SAEUR name, symbol, Ethereum Mainnet network and full contract address.	From the same SVG master; only with SAEUR data.
5.	Web icon and favicon variants	Technical size variants derived from the official emblem without distortion or redrawing.	Restricted to the locked website and approved exports.
6.	SAHYP or another future designation	Inactive, unreleased brand asset.	MUST NOT BE PUBLISHED as a brand asset.

The public brand-asset package is based exclusively on the official SATIS emblem, its approved composite logo and the verified token identification of SAUSD and SAEUR. No new emblem, alternative SATIS logo or mark merged with a partner logo may be introduced without separate approval.

4. PUBLIC AND INTERNAL ASSET SCOPE

Edition	Content	Exclusion
Public web asset scope	Approved SVG/PNG/WebP exports, short usage guide and public SHA-256 manifest.	No layered source, editing history, personal data or unapproved variant.
Internal asset scope	Source and working files, export parameters, file provenance, change log and internal SHA-256 manifest.	Not for publication or general download.

5. USE OF THE SATIS INVESTMENT LOGO

5.1 Primary version

For the first presentation together with the name, the horizontal composite logo consisting of the SATIS emblem and the SATIS Investment wordmark should be preferred. The principal symbol of the graphic system remains the official SATIS emblem; the composite logo is its approved project-identification version supplemented with the name.

5.2 Standalone emblem

The standalone official SATIS emblem consists of an interlocking deep-navy and silver-grey diagonal geometric ribbon element; the white negative space formed between them is an inseparable part of the mark. The emblem may be used independently in icon-like, small-scale or repeated applications, for example as a favicon, application icon, token emblem or secondary decorative element in an already identified document. It may not replace the full horizontal logo in a first presentation where the SATIS Investment name is otherwise not visible.

5.3 Clear space and minimum size

Application	Recommended minimum	Mandatory rule
Horizontal logo - digital	160 px width	The SATIS and Investment text must remain clearly legible.
Horizontal logo - print	35 mm width	A smaller size is permitted only after a separately verified print test.
Standalone emblem	24 px / 8 mm	The internal negative spaces of the emblem must not merge.
Clear space	at least 10% of the full logo width on every side	No text, frame, other logo or crop edge may enter the clear space.

5.4 Background use

- the full-colour logo should primarily be used on a white or light neutral background;
- on dark backgrounds, only a separately approved negative or light version may be used;
- no photograph, texture or animation may appear behind the logo if it reduces contrast or alters perceived colours;
- no automatic white box, shadow or outline may be added around the logo unless included in the approved export.

5.5 Prohibited modifications

Prohibited	Reason
stretching, compression, rotation, slanting or mirroring	disrupts the fixed geometry
recolouring, channel swapping or a custom gradient	changes brand identity
detaching elements or retyping the wordmark	creates a non-original logo variant
shadow, glow, 3D effect, frame or animated distortion	creates an unapproved visual effect
merging with another logo or creating a joint emblem	may imply a false partnership or organisational relationship

6. OFFICIAL TOKEN EMBLEM SHARED BY SAUSD AND SAEUR

SAUSD and SAEUR use the same official SATIS token emblem. The official master file is the SVG file “SATIS_SAUSD_SAEUR_Official_Token_Emblem_32x32_v1.0.svg” included in the document package. The same controlled SVG is to be submitted for both tokens in Etherscan token-information updates. The emblem alone does not distinguish SAUSD from SAEUR; token identity is always determined jointly by the official name, symbol, Ethereum Mainnet network and full contract address. Manual redrawing, reconstruction from a screenshot, recolouring or geometric modification of the master file is prohibited.

Official shared SAUSD / SAEUR token emblem - SVG master: SATIS_SAUSD_SAEUR_Official_Token_Emblem_32x32_v1.0.svg

Field	SAUSD	SAEUR
Official name	SATIS US Dollar	SATIS Euro
Symbol	SAUSD	SAEUR

Etherscan submission	The same SVG with SAUSD metadata	The same SVG with SAEUR metadata
Technical size	32 x 32 px SVG; verified PNG export as required	32 x 32 px SVG; verified PNG export as required

CRITICAL TOKEN-IDENTIFICATION RULE

A name, symbol or token emblem can be copied. An asset may be treated as official only when both its Ethereum Mainnet network and full contract address match the official on-chain documentation of SATIS Investment.

6.1 Platform, wallet and explorer use

- the shared official token emblem may be associated with SAUSD or SAEUR only together with the corresponding token name, symbol and full exact contract address;
- for platform submissions, the token name, symbol, network, decimals and contract address must come from a single controlled data set;
- delivery of the logo file does not constitute platform, exchange or legal approval;
- a token image displayed or cached automatically by a third party does not become official if it differs from the approved asset;
- the token emblem must not be used as visual support for any promise of guaranteed parity, stablecoin or e-money status, return, liquidity, payback or conversion.

6.2 Joint presentation

SAUSD and SAEUR may be presented side by side with the same official emblem and equal visual weight, but each presentation must clearly state the corresponding token name and symbol and, on a technical interface, the full contract address or a verified link to it. Neither token may be presented as subordinate to, a substitute for, or automatically convertible into the other. No conversion arrow, equality sign, guaranteed exchange rate or graphic suggesting 1:1 redemption may be placed between the two token designations.

7. PERMITTED USE

Use case	Permitted condition
Official SATIS Investment website and documentation	Using the approved export, current document version and official communication boundaries.
Etherscan, wallet, token registry or technical data platform	Linked to the correct Ethereum Mainnet contract address and token metadata.
Press and editorial presentation	Without modification, with SATIS Investment attribution and without a misleading partnership claim.
Educational or analytical reference	The logo must not dominate, project statements must not be distorted, and the source and date must be stated.
Approved partner communication	Separate written permission, an approved layout and an exact description of the relationship are required.

8. PROHIBITED USE

- to identify a false token, contract, website, social-media profile, wallet connection, fundraising or payback process;
- to imply a partnership, representation, audit, regulatory, exchange or sponsorship relationship without written approval;
- on any commercial product, merchandise, NFT, token or service not approved by SATIS Investment;
- in advertising that guarantees return, exchange rate, liquidity, stablecoin status, redemption, SAHYP entitlement or project completion;
- in a domain, application name, username or company designation that may cause confusion;
- for resale, sublicensing or registration as one's own mark of the source file of the logo or token emblem;
- placed next to a signature, stamp, approver name or professional identifier in a way that suggests public approval or personal certification.

NO LICENCE MAY BE INFERRED

The availability of a public brand asset for download does not constitute a general licence, representation right or unrestricted commercial-use permission. Prior written permission is required for any use beyond the permitted scope.

9. THIRD-PARTY AND PARTNER PRESENTATION

In a joint presentation, a clear separation must be maintained between the SATIS Investment logo and the partner logo. The terms “partner”, “supporter”, “technology provider”, “adviser”, “media” or any other relationship may be used only in accordance with the actual documented legal relationship. Side-by-side logos alone cannot override the true substance of the contractual relationship.

10. SUPPORTING VISUAL SYSTEM

The fixed deep-navy, silver-grey and white-negative-space appearance of the official SATIS emblem, and the inherent colours of the composite logo and token emblem, may not be modified. The palette below is the supporting colour system for the approved SATIS Investment document and web environment; it does not authorise recolouring of logo or emblem files.

Colour / role	Code	Application
SATIS Deep Navy	#061C3E	primary web background, institutional depth
Document Navy	#0B2F57	headings, header, table header
SATIS Teal	#1D7482	subtitle, controlled digital accent
Approval Green	#2F6F57	approved status and positive control
Neutral Silver / Gray	#78909C	secondary text, metadata, separation
Warning Gold	#9A6A20	pending or conditional status
Critical Red	#9B1C31	security, prohibition and anti-scam warning

10.1 Typography

- the logo wordmark is a graphic element; it may not be reproduced with a font or retyped as a substitute logo;
- official documentation should primarily use Liberation Sans, or Arial or Helvetica sans-serif in compatible environments;
- headings are dark navy and body text dark grey; all-capital body text may be used only for short status notices;
- the spelling of “SATIS Investment”, “SAUSD”, “SAEUR”, “SATIS US Dollar” and “SATIS Euro” may not be altered.

11. FILE FORMAT, NAMING AND INTEGRITY

Element	Public-export principle	Internal record
Project logo	approved SVG and required web PNG/WebP exports	original source, export parameters, change log
SATIS emblem	approved SVG and technical icon sizes	source and icon variants
Shared SAUSD / SAEUR token emblem	SATIS_SAUSD_SAEUR_Official_Token_Emblem_32x32_v1.0.svg; the same submission emblem for both tokens; verified PNG export as required	Original controlled SVG, SHA-256, exports and Etherscan platform-submission copies
Document	HU/EN searchable PDF and DOCX under the release rule	internal signable DOCX/PDF and approval record
Integrity	public SHA-256 manifest	full internal SHA-256 manifest and file provenance

Recommended filename scheme: SATIS_[Asset]_[Variant]_[Language-or-NA]_v[Version].[ext]. The actual final file list is frozen at release and an SHA-256 checksum is generated for every file.

12. FINAL DOWNLOAD PACKAGE STRUCTURE

ZIP package	Mandatory content
COMPLETE ZIP	HU/EN public and internal documents; public assets; internal source and control files; all SHA-256 manifests; package inventory.
INTERNAL-USE ZIP	Internal signable documents; source and working files; change log; internal asset register; internal SHA-256 manifest.
WEB ZIP	Public HU/EN documents only; approved public asset exports; public usage summary; public SHA-256 manifest.

13. ACCESSIBILITY AND TECHNICAL PRESENTATION

- meaningful alt text is required for every informative logo image; an empty alt attribute may be used for purely decorative repetition;
- the token name and symbol must also appear as text next to the token emblem; colour alone must not carry exclusive meaning;
- the SVG file must not contain executable script, external links, personal metadata or hidden editing information;
- the web export must be checked in multiple browsers, on light and dark backgrounds, and at 32 x 32 px;
- the public package may contain only final files that have been security-checked and recorded with SHA-256.

14. CHANGE CONTROL AND REVIEW

The guide and asset package must be reviewed before any logo or identity change, change to the official token emblem or its submission file, introduction of a new token or official system designation, change to a domain or contact detail, change to platform requirements, incident of false brand use, status change in the trademark application or registration procedure, or introduction of a new partner or commercial-use model.

Previous asset versions must be retained with archived status and access control. A previous file must not remain at a current download point once a new approved version takes effect.

15. SOURCES AND CONTROL BASES

Control bases: locked Hungarian website v1.0.10; documentation matrix v1.5; Token Evolution Summary v1.0; Official On-chain Verification Sheet v1.0; SAUSD/SAEUR Token Summaries v1.0; Risk Notice v1.0; SATIS_SAUSD_SAEUR_Official_Token_Emblem_32x32_v1.0.svg; HIPO submission confirmation (M2602698; IÜF/62437-1/2026; SZTNH_EBEJ-20260720-14491); internal brand and asset records.

APPROVAL AND PUBLIC AUTHENTICITY

Approval area	Status
Project owner	APPROVED
Legal	APPROVED
Compliance	APPROVED
Technical	APPROVED

PUBLIC EDITION - APPROVED

The content of this document corresponds to the signable original edition retained in the closed internal records of SATIS Investment. Personal and professional identifiers, signatures and stamp impressions of approvers have been removed from the public copy to prevent misuse. Authenticity may be verified by the document identifier, version number and published SHA-256 checksum.

Use of the public brand assets does not constitute a general licence, partnership or representation right. Official token identity is always determined by the combined match of the Ethereum Mainnet network and the full contract address.
