Conciliation or alternative dispute-resolution body, if applicable	**COMPLETED**

1. PURPOSE AND SCOPE

These Terms of Use set out the basic rules governing the use of the SATIS Investment website available at satisinvestment.com, including its public documents, downloadable materials, brand assets, token data and external links.

They apply to viewing and informational use of the website. They do not govern token sales, token allocations, investment agreements, payback applications, partnership agreements or any other individual legal relationship. Separate documentation and specific terms are required for any such activity if introduced later.

Viewing the website does not in itself create an investment, token-allocation, payback, conversion or partnership agreement.

2. IDENTIFICATION OF THE SERVICE PROVIDER

The official details of the actual service provider or website operator are set out in the fields to be completed in the Document Control section. The project name SATIS Investment does not by itself replace legal identification of the service provider.

This document may be published and brought into effect only after all operator, governing-law and dispute-resolution fields have been completed accurately.

3. DEFINITIONS

Website means the satisinvestment.com domain and its official subpages.

Service provider or operator means the natural or legal person identified in the Document Control section that actually operates the website.

SATIS Investment means the project and its official communication name; it does not necessarily constitute a separate legal person by itself.

User means any natural person or organisation that views or uses the website.

Official document means a document identified on the website by current status, document ID, version and publication date.

4. CURRENT FUNCTIONAL LIMITS OF THE WEBSITE

The website underlying this document is a static informational and project-contact interface. It currently provides no user account, in-site token purchase, automatic wallet connection, on-chain transaction initiation, automatic payback application or SAHYP conversion.

Before any such function is introduced, these Terms, the legal notices, privacy documentation and related compliance processes must be reviewed.

5. INFORMATIONAL NATURE OF THE WEBSITE

The website presents factual information about the SATIS Investment project, the SAUSD and SAEUR tokens, and related current and future system directions.

Its content is not personalised legal, financial, tax or investment advice, a public offer, an offer to buy or sell, a promise of return or a guaranteed token allocation.

Use of the website is also subject to the SATIS Investment Legal and Financial Disclaimer and the SATIS Investment Risk Notice.

6. OFFICIAL CONTENT, VERSIONS AND DOCUMENT HIERARCHY

Only properly identified communications published on satisinvestment.com or from an @satisinvestment.com email address may be treated as official.

For public documents, the document ID, version number, publication date and status together determine which version is current.

In the event of inconsistency, the order of precedence is: mandatory law or regulatory decision; a valid signed individual agreement; the latest official SATIS Investment document on the relevant subject; and any shortened website summary.

The Hungarian document is the substantive master version. The English version is a controlled official translation. Unless mandatory law or an individual agreement provides otherwise, the Hungarian master version prevails in the event of inconsistency.

7. PERMITTED USE

Users may view the website for personal, professional or institutional information purposes and may retain and cite publicly downloadable documents in unaltered form.

Quoting or sharing is permitted only where the meaning is not distorted, SATIS Investment is clearly identified as the source, the title, version and date are not altered, and the use does not imply partnership, guarantee or official representation.

8. PROHIBITED USE

Unauthorised testing, disruption or circumvention of website security or operation is prohibited, as is the use of malicious code, automated attacks, overloading or phishing mechanisms.

Misleading use of the SATIS Investment, SAUSD or SAEUR name, logo or documents is prohibited, including creation of a false token, contract address, website, profile or payback process.

Content must not be altered to suggest a stablecoin, return, liquidity, parity, payback or conversion guarantee. Unauthorised publication of approver names, signatures, seals or identifiers is also prohibited.

9. INTELLECTUAL PROPERTY AND BRAND USE

The SATIS Investment name, project logo, SAUSD and SAEUR token logos, website texts, visual elements and documents may be protected by copyright, trademark or other intellectual-property rights.

Viewing the website transfers no ownership, licence, trademark-use right or official-representation authority. Except for uses expressly permitted in the Brand Assets package, alteration or misleading commercial use of the logos requires prior written permission.

10. TOKEN DATA AND ON-CHAIN VERIFICATION

Token authenticity cannot be established from a name, symbol or logo alone. Users must verify the Ethereum Mainnet network and the complete official contract address.

Official SAUSD contract address: 0x24C7A87C4a85798C9f2B33DE75e96d230388cBa7

Official SAEUR contract address: 0x7e165e37A26d120dd21a50D7B65ED007acE26231

Blockchain transactions generally cannot be reversed through central administrative intervention. Users are responsible for checking the network, contract address, destination address, token quantity, gas fee and allowance.

11. EXTERNAL LINKS AND THIRD-PARTY SERVICES

The website may link to external services such as blockchain explorers for information and verification purposes.

External services operate under their own terms, privacy rules and technical risks. A link does not by itself indicate ownership, partnership, recommendation or assumption of responsibility.

12. SECURITY AND USER RESPONSIBILITY

Users are responsible for the security of their own device, browser, email account and wallet.

SATIS Investment does not request private keys, seed phrases, wallet passwords, direct wallet access or unsolicited token transfers to an unofficial address.

In the event of a suspicious communication, users must verify the official domain, email domain and contract address together.

13. AVAILABILITY, MAINTENANCE AND CHANGES

Website availability may be temporarily restricted or interrupted for technical, security, maintenance, provider-related or force-majeure reasons.

Content may change due to project development, legal change, technical updates or document review. Such changes do not retroactively alter a valid signed individual agreement unless required by mandatory law or agreed by the parties.

14. CONTACT

Official contact points are: project and cooperation: projekt@satisinvestment.com; token and verification: token@satisinvestment.com; press and media: media@satisinvestment.com.

Sending an email, receiving an automated acknowledgement or having an enquiry accepted does not constitute acceptance of an offer, conclusion of a contract, token allocation or participation entitlement.

15. LIABILITY AND MANDATORY LAW

Users must independently assess the risks of using the website or relying on its content and should obtain independent professional advice where appropriate before making a digital-asset decision.

The service provider’s liability may be limited only to the extent permitted by applicable mandatory law. These Terms do not exclude liability that cannot lawfully be excluded or limited.

16. PRIVACY AND COOKIES

Processing of personal data is governed by the current SATIS Investment Privacy Notice.

Use of cookies and local browser storage is governed by the current Cookie Notice. Before introducing new analytics, marketing, embedded or other third-party services, those documents and any required consent mechanism must be reviewed.

17. COMPLAINTS AND REPORTING UNLAWFUL CONTENT

Issues concerning the website, documents, brand misuse, false tokens or misleading communications may be reported to projekt@satisinvestment.com or, for token matters, token@satisinvestment.com.

A report should, where possible, include the relevant URL, profile, contract address, screenshot and a brief description of the conduct concerned.

18. GOVERNING LAW AND DISPUTES

These Terms are governed by: COMPLETED

Competent court or dispute-resolution forum: COMPLETED

For consumers, these provisions do not deprive the consumer of any protection or forum available under mandatory law.

19. SEVERABILITY AND NO WAIVER

If any provision is invalid or unenforceable, this does not automatically affect the validity of the remaining provisions. The affected provision must be interpreted or amended consistently with mandatory law and its original regulatory purpose.

Failure or delay in exercising a right does not automatically constitute a waiver of that right.

20. EFFECTIVE DATE, VERSION CONTROL AND ARCHIVE

This edition is substantively final and approved by all four functions, but it does not take effect and must not be published until the operator and jurisdiction fields have been completed.

After completion, the publication and effective date must be recorded while retaining the document ID and version. Any substantive amendment requires a new version and a new approval cycle.

Previous versions must be retained in a retrievable archive with archived status.

KEY WARNING

The website and related documents are informational. They do not constitute personalised legal, financial, tax or investment advice, an offer to the public, a contract, a guaranteed participation opportunity or a promise of return.

1. PURPOSE AND SCOPE

This document establishes a consistent set of general legal and financial limitations applicable to the satisinvestment.com website, the public documents of SATIS Investment, and project communications concerning the SAUSD and SAEUR tokens.

In particular, the document addresses:

- the informational nature of the website and documentation;
- the exclusion of personalised advice;
- the exclusion of an offer to the public, a contractual offer and automatic participation entitlement;
- the principal limitations of the reference nature, market value and risks of SAUSD and SAEUR;
- the absence of guarantees relating to returns, exchange rates, liquidity, payback and conversion;
- the conditional nature of forward-looking statements;
- the exclusion of any implication of regulatory approval or authorisation;
- the treatment of external information sources and services;
- the user's responsibility for independent decision-making and verification;
- the extent of limitation of liability permitted by mandatory law.

Detailed token data are set out in the SAUSD and SAEUR Official Token Summaries, risks in the SATIS Investment Risk Notice, conditional payback in the SATIS Payback Framework, and the future token direction in the SATIS Token Evolution Summary.

2. LEGAL NATURE OF THE WEBSITE AND DOCUMENTATION

The primary purpose of the satisinvestment.com website and the documentation available on it is to present the SATIS Investment project, the current tokens, the system logic, the risks and the official verification points.

Unless a separate, express and duly signed individual document provides otherwise, the website, a downloadable summary or a general information document does not constitute:

- a contract or contractual offer;
- an invitation to a public token sale or subscription;
- a recommendation to buy or sell a financial instrument;

- a guaranteed financing or investment opportunity;
- an unconditional payment obligation of a specified legal entity;
- a crypto-asset white paper or securities prospectus approved by an authority.

The project name SATIS Investment does not by itself replace the official identification of the specific contracting party, issuer, service provider or legal entity liable for payment. Such a legal entity may assume obligations only in a separate effective document.

3. NO PERSONALISED ADVICE

Information on the website and in the documents does not constitute personalised:

- legal advice;
- investment advice or an investment recommendation;
- financial or credit advice;
- tax or accounting advice;
- technical or cybersecurity advice;
- an assessment of suitability, appropriateness or risk tolerance.

SATIS Investment does not know the individual financial position, objectives, legal status, tax residence, experience or risk-bearing capacity of a visitor or token holder. Before making any decision, it may be appropriate to engage an independent, duly authorised professional.

4. NO OFFER TO THE PUBLIC OR AUTOMATIC PARTICIPATION

Project, token and system information on the website does not by itself constitute an unlimited or uncontrolled public primary token sale.

Any actual primary participation or token allocation may be subject, in particular, to:

- appropriate legal and regulatory classification;
- identification of the contracting or obligated legal entity;
- an individual agreement or participation terms;
- identity, AML/KYC and sanctions checks;
- geographical, personal, quantitative or other eligibility restrictions;
- the financial, technical and operational capacity of the project.

The technical ERC-20 transferability of the tokens does not mean that they may lawfully be offered or sold without restriction to every person or in every jurisdiction.

5. FUNDAMENTAL NATURE OF SAUSD AND SAEUR

SAUSD and SAEUR are the current fixed-supply ERC-20 tokens of SATIS Investment deployed on Ethereum Mainnet. SAUSD uses a USD reference and SAEUR uses an EUR reference.

The reference serves as a unit of reference in specified SATIS Investment financing and settlement communications. It does not represent:

- a guaranteed secondary-market price of 1 USD or 1 EUR;
- continuous or verified 1:1 fiat backing;
- a bank reserve account or deposit protection;
- automatic price stabilisation;
- an unconditional right to redeem at 1:1;
- legal identity with the US dollar or the euro.

SATIS Investment does not communicate SAUSD or SAEUR as stablecoins, electronic money, bank deposits, legal tender or official digital fiat currency. Final legal classification may nevertheless be determined by applicable law, actual functionality, the method of distribution and the interpretation of the competent authority or court.

6. NO GUARANTEE OF RETURN, VALUE OR LIQUIDITY

SATIS Investment does not guarantee:

- a return, interest, dividend or profit share;
- appreciation in value or a minimum price;
- USD or EUR parity;
- a trading pair or listing on an exchange or DEX;
- buyer demand, trading volume or market-making services;
- continuous liquidity or liquidity available at any time;
- sale of a token at a specified price or within a specified period.

The secondary-market price of SAUSD and SAEUR may differ from the reference value, may fluctuate significantly and may suffer a complete loss of economic value. Technical transferability is not equivalent to guaranteed market saleability.

7. PAYBACK: CONDITIONAL AND NOT AUTOMATIC

Payback is not part of the SAUSD or SAEUR smart contract, and mere holding of a token does not create an automatic redemption or repayment right exercisable at any time.

The SATIS Payback Framework establishes a documentation framework but does not by itself activate a payback service. Any payback may apply only where all of the following are present:

- an effective and officially published activation notice;
- an identified obligated legal entity;
- an available and approved financial capacity;
- a legal and compliance activation gate;
- successful eligibility and wallet-control checks and, where required, AML/KYC checks;
- individual written acceptance;
- proper token transfer and settlement.

The 0.75 reference settlement ratio may be interpreted only together with the complete and effective Payback Framework. It is not stablecoin redemption, a guaranteed market price, an open offer or an unconditional payment obligation.

8. FUTURE FUNCTIONS AND SAHYP

The SATIS system may develop with additional energy, data, origin-verification, transactional and token functions. Each such element is a future, conditional development direction unless a separate document verifiably identifies it as implemented and active.

SAHYP is not currently an issued token. There is no active SAHYP smart contract, official contract address, operating conversion or guaranteed launch date.

Holding SAUSD or SAEUR does not create automatic entitlement to SAHYP, a conversion right, a migration claim or a guarantee of appreciation. Any later system path requires separate technical, legal, economic, compliance and project-owner approval.

9. FORWARD-LOOKING STATEMENTS

Planned developments, dates, partnership directions, market integrations and energy or technology functions stated on the website and in the documents may constitute forward-looking statements.

They may:

- be based on estimates, current plans and assumptions;
- not be guaranteed;
- be modified, delayed or abandoned;
- depend on external financing, technical, legal, market and partner conditions;
- not create automatic contractual, compensation or payment obligations.

A previously communicated plan, objective or milestone is not an unchanged and binding commitment if it is later officially amended or archived.

10. REGULATORY STATUS AND REGULATORY APPROVAL

Deployment of a smart contract, Etherscan verification of source code, operation of the website, internal approval of documents or display of token data on a platform does not by itself constitute:

- authorisation by the MNB, ESMA, EBA, EIOPA or another authority;
- regulatory registration or classification;
- a final determination of the legal category of the tokens;
- regulatory certification of the financial reliability of the project or tokens;
- application of an investor-protection, deposit-guarantee or compensation scheme.

Regulation (EU) 2023/1114 on markets in crypto-assets establishes harmonised requirements, among other matters, for certain offers of crypto-assets to the public, admission to trading and related services. Specific applicability must be assessed separately before any actual market or contractual step.

Where applicable regulation requires a crypto-asset white paper, legal-classification opinion, authorisation, notification, registration or other mandatory document, this Disclaimer and the other general SATIS Investment documents do not replace it.

11. ACCURACY, COMPLETENESS AND CURRENCY OF INFORMATION

SATIS Investment seeks to communicate information that is supportable, verified and current. Nevertheless, it cannot be guaranteed that the website or any document will at all times be error-free, complete, continuously available or immediately updated.

In the event of inconsistency:

- for technical token data, the official contract address and on-chain status verifiable on Ethereum Mainnet are the primary technical reference;
- for project and operational conditions, the latest officially published document with current status governs;
- in an individual legal relationship, the signed agreement and mandatory law take precedence over general website information.

SATIS Investment may amend the website and documentation to reflect project development, technical facts, legal requirements or correction of errors. Material document changes receive a new version number and status designation.

12. EXTERNAL LINKS AND THIRD-PARTY SERVICES

The website may contain links to external services, including Etherscan pages, blockchain infrastructure or other third-party sources.

An external link:

- serves information and verification purposes;
- does not automatically imply partnership, endorsement or guarantee;
- does not make third-party content a statement of SATIS Investment;
- does not ensure continuous availability, accuracy, security or legality of the external site.

Use of a third-party site or service is subject to its own terms, privacy rules and risks.

13. ON-CHAIN TRANSACTIONS AND TECHNICAL RESPONSIBILITY

Because of the nature of blockchain, Ethereum transactions are generally final and cannot be reversed centrally. The SAUSD and SAEUR smart contracts contain no owner, pause, blacklist, forced-transfer or upgrade function.

The user is responsible in particular for:

- verifying the correct network and full contract address;
- checking the destination address and token amount;
- securely managing the private key, seed phrase and wallet access;
- understanding smart-contract allowances and signature requests;
- using an interface that correctly handles the decimals value of 0;
- considering gas costs and the risk of failed transactions.

SATIS Investment does not request a private key, seed phrase, recovery phrase, wallet password or direct wallet access.

14. GEOGRAPHICAL AND PERSONAL RESTRICTIONS

Internet availability of the website does not mean that the project, the tokens, any primary participation opportunity, payback or another service is available or lawful in every country and for every person.

The visitor is responsible for verifying, based on the visitor’s jurisdiction, legal status and circumstances, whether:

- acquisition, holding or transfer of a token is lawful;
- any authorisation, notification, tax or reporting obligation applies;
- sanctions, anti-money-laundering or another restriction applies;
- a particular participation, trading or settlement process may be used.

SATIS Investment may restrict or decline a relationship, allocation or process where justified by legal, compliance, sanctions, security or operational considerations.

15. USER RESPONSIBILITY FOR INDEPENDENT DECISIONS

Visitors and token holders must conduct their own independent assessment. They should not rely solely on marketing communications, social-media posts, third-party opinions, historical price movements or the expected value of future functions.

Before making a decision, it is particularly appropriate to:

1. read the latest official documents in full;

2. verify the contract address and on-chain data;

3. consider risk-bearing capacity and the possibility of total loss;

4. understand the legal, tax, financial and technical consequences;

5. engage an independent professional where necessary.

16. LIMITATION OF LIABILITY

To the fullest extent permitted by mandatory law, SATIS Investment gives no guarantee regarding continuous availability or completeness of the website or documentation, fitness for a particular purpose, the market value or liquidity of the tokens, or implementation of any future function.

To the extent permitted by mandatory law, SATIS Investment is not liable for loss or damage arising, among other things, from:

- the visitor’s own decision or assumption of risk;
- market-price movements or lack of liquidity;
- incorrect use of a network, address, amount or allowance;
- loss or compromise of a private key or wallet access;
- operation of an external service provider, platform, application or linked site;
- modification, delay or abandonment of future plans;
- use of website information without independent professional verification.

Neither this document nor another general SATIS Investment statement excludes or limits liability that cannot lawfully be excluded or limited under applicable mandatory law.

17. OFFICIAL COMMUNICATIONS AND THIRD PARTIES

SATIS Investment treats only communications published on the satisinvestment.com domain, through the @satisinvestment.com email domain and in official versioned documentation as its official communications.

An unauthorised third-party statement, false profile, counterfeit token, copied logo or misleading offer does not become an official SATIS Investment communication merely because it uses the project name, emblem or token data.

A relationship between SATIS Investment and another organisation using SATIS or a similar name may be established only by an express official statement. Identical or similar names alone do not indicate an ownership, contractual, organisational or business relationship.

18. LANGUAGE VERSIONS AND DOCUMENT HIERARCHY

The content master version of the official SATIS Investment documentation is prepared in Hungarian. The English version is a controlled official translation.

In the event of a discrepancy, the Hungarian master version prevails unless mandatory law, a regulatory requirement or a signed individual agreement provides otherwise.

The document hierarchy is:

1. mandatory law and a decision of an authority or court;

2. a valid signed individual agreement;

3. the effective specific SATIS Investment document governing the subject;

4. this general Legal and Financial Disclaimer;

5. a brief website summary or marketing communication.

19. OFFICIAL VERIFICATION POINTS

Field	Value
Official project	SATIS Investment
Official domain	satisinvestment.com
Project contact	projekt@satisinvestment.com
Token and verification contact	token@satisinvestment.com
Press and media contact	media@satisinvestment.com
SAUSD contract	0x24C7A87C4a85798C9f2B33DE75e96d230388cBa7
SAEUR contract	0x7e165e37A26d120dd21a50D7B65ED007acE26231

A token name, symbol or emblem alone does not prove authenticity. The full contract address and official domain must be verified before every transaction or contact.

20. REVIEW AND AMENDMENT

This document must be reviewed in particular:

- before beginning an offer of tokens to the public or primary allocation;

- before admission to a trading platform or an official DEX pair;
- before activation or amendment of payback;
- before introduction of SAHYP or another future token function;
- when the obligated, issuing or contracting legal entity changes;
- upon a material regulatory, legal or supervisory change;
- after a significant technical, market or security event;
- when the content of the website or related documents changes materially.

An amended document receives a new version number. The previous edition must be clearly marked as archived.

21. LEGAL AND REGULATORY REFERENCE BASIS

- Regulation (EU) 2023/1114 of the European Parliament and of the Council on markets in crypto-assets (MiCA): https://eur-lex.europa.eu/eli/reg/2023/1114/oj/eng
- Joint consumer warning of the EBA, EIOPA and ESMA dated 6 October 2025 on crypto-asset risks and potentially limited legal protection: https://www.eba.europa.eu/publications-and-media/press-releases/eu-supervisory-authorities-warn-consumers-risks-and-limited-protection-certain-crypto-assets-and
- Magyar Nemzeti Bank - MiCA and crypto-asset information and guidance: https://www.mnb.hu/felugyelet/szabalyozas/felugyeleti-szabalyozo-eszkozok/tajekoztatok-utmutatok
- SATIS Investment locked Hungarian website v1.0.10 and the approved official project and token documents.

Listing the reference basis does not constitute regulatory approval or a statement that every listed rule automatically applies in the same way to all current or future project activities.

22. FINAL STATEMENT

The SATIS Investment website and documentation serve information and verification purposes. They do not constitute personalised advice, automatic participation entitlement, an offer to the public, a guaranteed return or liquidity promise, or an unconditional payback or conversion obligation.

The market value of SAUSD and SAEUR may change and may be lost in part or in full, while future functions associated with the tokens may be modified, delayed or abandoned.

Every visitor and token holder must independently verify official sources, assess their own risks and obtain independent professional advice where necessary.

Name, address and processing location of the email provider	
IT operator or security provider	
Retention period for closed general enquiries	
Retention period for contract-preparation data	
Retention period for technical logs	
Whether transfers outside the EEA occur	
Transfer legal basis and safeguard, where applicable	
Official publication date	
Effective date	

1. PURPOSE AND SCOPE OF THIS NOTICE

This Privacy Notice transparently describes processing operations relating to visitors of satisinvestment.com and natural persons who contact SATIS Investment through its official email addresses.

The Notice applies to the website's current static operation and to the project, token, strategic and media contact channels. It does not cover future token allocation, payback procedures, KYC/AML checks, contracting, employment or any other process requiring a separate privacy notice and internal record.

The Notice follows the transparency and information requirements of the European Union General Data Protection Regulation (GDPR). Actual processing must at all times correspond to the published text.

2. MANDATORY IDENTIFICATION OF THE CONTROLLER

The final public edition must identify the controller in a legally sufficient and directly accessible manner. The project name "SATIS Investment" does not by itself replace identification of the natural or legal person acting as controller.

Official name or company name of the controller:

Legal form: [TO BE COMPLETED]

Registered office or postal address:

Company registration or registry number:

Tax number, where applicable:

Privacy contact email:

Name and contact details of the Data Protection Officer:

3. CURRENT TECHNICAL OPERATION OF THE WEBSITE

The current website is static. It does not provide user accounts, a token-purchase interface, wallet connection, online payment, newsletter subscription or a server-side contact form.

The contact form prepares the message in the visitor's browser and opens the visitor's own email client through a mailto link. The form content is not submitted to the website server. Once the email is sent, however, the sender's email provider, the recipient's email provider and the controller process the information for handling the enquiry.

At the user's express action, the website may use the browser clipboard function to copy a contract address. This function by itself does not transmit information to SATIS Investment.

4. CATEGORIES AND SOURCES OF PERSONAL DATA

The primary source of personal data is the data subject who provides information by email or through the web interface that opens the data subject's own email client.

- identification and contact information: name, email address and organisational or professional information where provided;

- the subject, topic, message text and attachments of the enquiry;
- technical email metadata, including sender, recipient, sending time, message identifier and delivery data;
- technical hosting logs, including IP address, timestamp, requested page or resource, browser and device characteristics, referrer, error code and security-event data;
- language preference stored in local browser storage;
- a wallet address or transaction identifier voluntarily provided by the data subject where needed for token verification.

SATIS Investment does not request private keys, seed phrases, passwords, authentication codes, direct wallet access or any other security secret. Data subjects must never send such information.

5. PURPOSES AND LEGAL BASES

5.1 General project, media and professional enquiries

Purpose: receiving, reviewing and responding to the enquiry, maintaining contact and documenting communications. Legal basis: as a rule, the controller's legitimate interest in handling incoming enquiries and maintaining project communications under Article 6(1)(f) GDPR.

5.2 Preparation of a contract or cooperation

Where the data subject requests preparation of a specific contract, cooperation or service, processing may rely on Article 6(1)(b) GDPR to the extent necessary to take pre-contractual steps at the data subject's request.

5.3 Token and on-chain verification enquiries

Purpose: verifying an official contract address, transaction or public on-chain data, answering a technical question and preventing deception. Legal basis: the legitimate interests of the controller and data subjects in authentic token identification and secure communications.

5.4 Legal claims, obligations and evidence

The controller may rely on Article 6(1)(c) GDPR to comply with legal obligations and on an appropriate legal basis and safeguards to establish, exercise or defend legal claims.

5.5 Future consent-based processing

The current website does not provide newsletter or marketing subscription. Any future introduction of such a function requires a separate voluntary, specific, informed and withdrawable consent process and prior revision of this Notice.

6. TECHNICAL LOGS AND WEBSITE SECURITY

The hosting provider and IT infrastructure may process technical logs to maintain website availability, handle errors, detect attacks, prevent abuse and preserve evidence. The typical legal basis is the controller's legitimate interest in maintaining a secure and functional website.

Hosting provider, logged data, access rights, retention period and any processing outside the EEA:

7. LOCAL BROWSER STORAGE AND COOKIES

The current language entry page may retain the selected language identifier in the visitor's local browser storage (localStorage). In the current code, the key is satisPreferredLanguage. The information remains on the user's device and is not transmitted by the website to an external analytics or marketing provider.

The current version does not use marketing or visitor-analytics cookies. Detailed technical information is provided in the separate Cookie Notice. Before introducing any analytics, embedded, social or marketing technology, SATIS Investment must prepare a cookie and tracker inventory, implement a consent mechanism where required and update the relevant documents.

8. RECIPIENTS AND PROCESSORS

Personal data may be accessed only by authorised persons of the controller to the extent necessary for their duties, and by actual service providers under contract and appropriate data-protection safeguards.

- hosting and infrastructure provider:
- domain and DNS provider, if it processes personal data:
- email and messaging provider:
- IT operator or security provider:
- legal, accounting or compliance advisers where necessary for the matter concerned;
- a public authority, court or other entitled body where required by law.

The public Notice will identify processors, or at least their categories and relevant details, based on the actual contractual environment.

9. INTERNATIONAL DATA TRANSFERS

Before finalisation, SATIS Investment must determine whether the hosting, email, security or other provider processes personal data outside the European Economic Area or permits access from such countries. Where it does, the Notice must identify the legal basis and safeguard for the transfer, such as an adequacy decision, Standard Contractual Clauses or another GDPR-compliant mechanism.

Whether international transfers occur, and the applicable legal basis and safeguards:

10. RETENTION PERIODS

Personal data may be retained only for as long as required for the relevant purpose or for as long as required by law, a legal claim, contractual evidence or security needs.

Processing activity	Determination logic	Final period
Closed general enquiry	limited period after the response and necessary follow-up, then deletion or anonymisation	approved
Contract preparation	until the process closes, then according to the applicable limitation and evidential periods	approved
Technical logs	short period necessary for security and error handling	approved
Legal claim or obligation	until expiry of the applicable statutory or claims period	approved

“Indefinitely”, “until consent is withdrawn” or “for as long as necessary” is not, by itself, a sufficient retention rule. The final document must specify a period or an objective criterion for determining it.

11. SPECIAL CATEGORIES, FINANCIAL INFORMATION AND SECURITY SECRETS

SATIS Investment does not request the voluntary disclosure of health, biometric, political, religious, trade-union, sex-life or criminal-liability information in general enquiries. If a data subject unnecessarily sends such information, the controller will, where possible, not use it and will delete it without undue delay unless retention is required by law or for a legal claim.

Private keys, seed phrases, passwords, two-factor authentication codes or information providing direct wallet access must not be sent. SATIS Investment does not request such information through official communications.

12. PUBLIC BLOCKCHAIN DATA

Wallet addresses, transaction identifiers and transaction data recorded on Ethereum’s public ledger are publicly available. A wallet address may constitute personal data in certain circumstances where it can be linked to a natural person.

The current website does not connect wallets and does not perform automated on-chain profiling. Where a data subject sends a wallet address or transaction identifier in a token-verification enquiry, it may be used only to the extent necessary to handle that enquiry.

13. MINORS

The website and SATIS Investment token communications are not specifically directed at children or minors. The current website does not provide an information-society service to children, age-based profiling or age-based registration.

If the controller becomes aware that a minor has sent unnecessary personal data, the information will be deleted with due regard to the circumstances and applicable legal obligations.

14. AUTOMATED DECISION-MAKING AND PROFILING

The current website and email contact process do not use decisions based solely on automated processing that produce legal effects concerning a data subject or similarly significantly affect the data subject, and do not perform marketing or investor profiling.

Before introducing such a function, SATIS Investment must conduct a separate legal assessment, provide data-protection information and, where required, perform a data-protection impact assessment.

15. DATA SECURITY

The controller must implement technical and organisational measures appropriate to the risk, including access restrictions, email and account security, logging, backups, access reviews, incident handling and data minimisation.

The public Notice must not reveal security-system details that could facilitate an attack or abuse. Specific measures must be recorded in the internal data-protection and information-security documentation.

16. RIGHTS OF DATA SUBJECTS

Subject to the GDPR, a data subject may request:

- information and access to personal data;
- rectification of inaccurate personal data;
- erasure where the applicable conditions are met;
- restriction of processing;
- withdrawal of consent for consent-based processing, without affecting the lawfulness of processing before withdrawal;
- data portability where the statutory conditions are met;
- objection to processing based on legitimate interests;
- not to be subject to a solely automated decision where Article 22 GDPR applies.

Requests may be submitted through the privacy contact address stated in the completed final edition. The controller will handle requests without undue delay and, as a rule, within one month; that period may be extended under the GDPR for complex or multiple requests.

The controller may request only necessary and proportionate information to confirm the requester's identity. A private key or wallet access must never be required for identification.

17. COMPLAINTS AND LEGAL REMEDIES

A data subject may lodge a complaint with a competent supervisory authority, in particular in the Member State of habitual residence, place of work or the alleged infringement. In Hungary, the supervisory authority is the Hungarian National Authority for Data Protection and Freedom of Information (NAIH).

- Website: naih.hu
- Registered office: 1055 Budapest, Falk Miksa utca 9–11, Hungary
- Postal address: 1363 Budapest, Pf. 9, Hungary
- Email: ugyfelszolgalat@naih.hu

Data subjects may also seek judicial remedies under the GDPR and applicable national law.

18. THIRD-PARTY SITES AND EXTERNAL LINKS

The website may contain links to external sites, such as Etherscan. Once an external site is opened, that provider's own privacy rules apply. The current website does not embed external sites in a manner that automatically transmits information to them on page load; this must be reassessed after any future technical change.

19. PERSONAL DATA BREACHES

Where a personal data breach occurs, the controller must investigate and document the event, assess the risk and, where required by the GDPR, notify the supervisory authority and, in cases of high risk, the affected data subjects.

The detailed incident-response procedure is an internal document and is not part of this public Notice.

20. CHANGES TO THIS NOTICE

This Notice must be updated before any change affecting the identity of the controller, processing purpose, legal basis, data categories, retention, recipients, providers, international transfers, use of cookies or trackers, wallet connection, user accounts or token-related participation processes.

Changes must carry a version number and publication and effective dates. Material changes must be communicated to data subjects in a prominent manner appropriate to the circumstances.

21. OFFICIAL LEGAL SOURCES AND GUIDANCE

- Regulation (EU) 2016/679 of the European Parliament and of the Council – GDPR
- European Data Protection Board – Transparency guidance
- European Data Protection Board – Guidelines 1/2024 on legitimate interests
- Hungarian National Authority for Data Protection and Freedom of Information
- Hungarian National Legislation Database – Act CXII of 2011

v1.0-HU-APR1	21 July 2026	First complete Hungarian approval draft	reviewed
v1.0-EN	21 July 2026	First final edition approved in all four approval areas	final

1. PURPOSE AND SCOPE OF THE DOCUMENT

The purpose of this Notice is to explain transparently and with technical accuracy what information may be stored on a visitor's terminal equipment and what information already stored there may be accessed by the satisinvestment.com website.

- to record the use of cookies and similar technologies by the current static website;
- to document local browser storage - localStorage - used in connection with language selection;
- to define the separation between necessary technologies and technologies requiring consent;
- to establish introduction gates for future analytics, marketing, social, embedded or other third-party technologies;
- to summarise user deletion options and browser controls.

This Notice does not replace the SATIS Investment Privacy Notice. Server-side hosting logs and email-related processing are not cookies; their detailed rules are set out in the Privacy Notice.

2. EXECUTIVE SUMMARY

Based on the current available codebase and documented operation, the SATIS Investment website does not use marketing or visitor-analytics cookies, advertising trackers, social pixels, or automatic wallet/payment tracking. The language entry interface may retain the user's selected language in browser localStorage under the key satisPreferredLanguage.

localStorage is not a traditional HTTP cookie, but because it stores information on terminal equipment it may fall within the technology-neutral scope of cookie rules. Sections 5 and 6 record the legal and compliance assessment of the current controlled operation; any technical change requires renewed review.

3. DEFINITIONS AND TECHNOLOGICAL BOUNDARIES

Term	Meaning	Current SATIS status
HTTP cookie	A small data item managed by the browser that may be set and returned by a server or client-side code.	Not identified in the supplied codebase.
localStorage	Persistent key-value browser storage; the data has no automatic expiry.	Documented for retaining the language preference.
sessionStorage	Local storage tied to the browser-tab session.	Not identified.
Tracker / pixel	A technology or network request capable of measuring visits, behaviour or conversions.	Not identified.
Embedded external content	Video, map, widget, social or other component loaded from an external provider.	Not identified in the documented baseline operation.
Server log	Technical event data handled by hosting or infrastructure.	Possible; not a cookie and within the scope of the Privacy Notice.

4. CURRENT TECHNICAL STATUS

This final document is based on the approved static HTML-based website operation and the controlled technical description in the Privacy Notice. Material changes to the actual web implementation must be tracked through event-driven review.

Technology / key	Provider	Purpose	Duration	Current classification
satisPreferredLanguage (localStorage)	SATIS Investment / first party	Remembering the language selected by the visitor.	No automatic expiry; until deletion or overwrite.	Technically documented; legal and compliance treatment is set out in Sections 5 and 6.
HTTP cookie	None identified	No documented purpose.	Not applicable.	Not identified in the current codebase.
Analytics / marketing	None identified	No documented measurement or advertising purpose.	Not applicable.	Must not be used without separate approval.
External tracker / pixel	None identified	No documented tracking purpose.	Not applicable.	Must not be used without separate approval.

IMPORTANT TECHNICAL BOUNDARY
A browser, hosting provider, CDN, security service or later-added external element may create storage or a network identifier independently of the source code. Any such change requires immediate technical inventory update and document review.

5. LEGAL AND COMPLIANCE FRAMEWORK

Rules governing the storage of information on terminal equipment or access to information stored there are technology-neutral. They are not limited to tools called cookies; localStorage and similar solutions must also be assessed.

- As a general rule, Article 5(3) of the ePrivacy Directive requires prior consent based on appropriate information for storage on, or access to, terminal equipment.
- An exception to the consent requirement may apply to a technical operation used solely for transmitting a communication or strictly necessary to provide a service explicitly requested by the user.
- A technology requiring consent must not operate before a valid, active user decision; pre-selected or implied acceptance must not be used.
- Where personal data are processed further, GDPR requirements also apply; however, the ePrivacy assessment is not limited to personal data.

CAUTIOUS CLASSIFICATION RULE
Storage under satisPreferredLanguage is first-party functional storage linked to the visitor’s own language selection. This document does not assert a general automatic exemption applicable to every implementation. If persistent storage is not strictly necessary for the language service explicitly requested by the user, it may be activated only after prior consent.

6. CONTROL RULES FOR THE LANGUAGE PREFERENCE

Field	Value
Key name	satisPreferredLanguage
Storage location	The localStorage area of the visitor’s browser
Data content	Only the short identifier of the selected language
Data source	The visitor’s own language-selection action
Automatic expiry	None; it may remain until deletion, overwrite or removal of the browser profile
External transfer	Under the current documented operation it is not transferred to an analytics or marketing provider
User control	Reselecting the language, deleting site data or using browser settings

Under the controlled web operation, the key may be created only after the visitor actually selects a language. If persistent storage cannot be justified as strictly necessary for the language service explicitly requested by the user, a separate “remember language” control or a session-only alternative must be used.

7. USER INFORMATION AND DELETION OPTIONS

A directly accessible Cookie Notice link is required in the website footer. The Notice must present the purpose, technology, provider, duration and deletion method in clear language.

- the stored value may be overwritten by selecting another language in the language selector;
- the value may be removed using the browser's site-data, localStorage or "cookies and site data" deletion function;
- private-browsing mode and certain browser settings may restrict or delete local storage;
- after deletion, the website may ask for the language again or apply a default language.

Browser menu names and operation may differ by vendor and version. SATIS Investment cannot guarantee the settings of third-party browser software, but it documents its own website technologies transparently.

8. WHAT IS NOT USED IN THE CURRENT DOCUMENTED VERSION?

- no visitor-analytics or traffic-measurement cookie is used;
- no advertising, remarketing or profiling technology is used;
- no social-media tracking code or pixel is used;
- no automatic wallet connection, transaction initiation or payment-provider tracker is used;
- no newsletter or marketing-automation tracker is used;
- no embedded external content is documented that activates third-party storage when opened.

NO ARTIFICIAL CONSENT BANNER IS REQUIRED
The current approved technology inventory contains no marketing, analytics or other technology requiring consent. An "Accept All" banner is therefore not justified. The Cookie Notice remains available and the language localStorage operation is controlled under this document.

9. SERVER LOGS AND INFRASTRUCTURE

Hosting, CDN, DNS, firewall or security infrastructure may process technical log data. These are not automatically cookies, but a provider may use its own cookie or another terminal-equipment identifier. Any such provider or configuration change requires immediate review of the technical inventory and this Notice.

The purpose, legal basis, retention period, recipients and international transfers relating to server logs must be specified in the final Privacy Notice.

10. INTRODUCTION GATES FOR FUTURE TECHNOLOGIES

None of the following technologies may be introduced as an automatic extension of this Notice. Before any introduction, a technical inventory, legal and compliance classification, privacy review, consent management where necessary, and renewed four-area document approval are required:

- web analytics, audience measurement or heatmaps;
- advertising, remarketing, affiliate or conversion-measurement technology;
- YouTube, Vimeo, map, social-media or other external iframe or embed;
- chatbot, customer-service widget, A/B testing or behavioural analytics;
- wallet connection, payment service, token-purchase or transaction module;
- CDN, bot-protection, CAPTCHA, fraud-prevention or device-identification solution;
- service worker, push notification, IndexedDB or long-term client-side cache where it stores or reads information.

11. MINIMUM CONSENT-MANAGEMENT REQUIREMENTS

Requirement	Required operation	Prohibited solution
Prior operation	A non-necessary technology is activated only after the decision.	Loading a tracker before the banner decision.
Active decision	Separate acceptance or category-by-category selection.	Pre-selected control or implied acceptance.
Refusal	Refusal as easy as acceptance.	Hidden, multi-step or misleading refusal.
Granularity	Separate control by purpose or meaningful category.	A single mandatory “accept all”.
Withdrawal	A setting available at any time and cessation of future storage.	No withdrawal option.
Demonstrability	The consent state and policy version are documented.	Unnecessary person-linked logging or an unverifiable state.

EMBEDDED CONTENT RULE
Third-party content that initiates storage or access when opened must not load by default before the required consent. A prior placeholder and separate activation must be used.

12. TECHNICAL CONTROL AND PERIODIC VERIFICATION PROCEDURE

During technical control at release and every review following a material website or provider change, at least the following tests must be performed from a clean browser profile, before consent and - where such a mechanism exists - after each available choice:

1. Check HTTP response headers and Set-Cookie fields on all main pages and language routes.
2. Record the state of document.cookie, localStorage, sessionStorage, IndexedDB, Cache API and service workers.
3. List network requests, redirects, pixels, beacons, WebSockets and external domains.
4. Examine iframes, videos, maps, social, CAPTCHA, chat and other widgets.
5. Check identifiers used by CDN, DNS, WAF, bot-protection, hosting and security services.
6. Test the creation, value and transmission of the satisPreferredLanguage key before and after language selection.
7. Sample-check storage durations, deletion processes and browser compatibility.
8. Record the results in the internal cookie/tracker inventory, obtain technical approval and reconcile them with the public Notice.

13. WEBSITE PRESENTATION REQUIREMENTS

- a direct “Cookie Management” or “Cookie Notice” link in the footer;
- display of the current storage inventory, purpose, provider, duration and deletion method;
- a clear statement as to whether marketing, analytics or another non-necessary technology is used;
- where no consent-requiring technology is used, the Notice remains available but no misleading acceptance banner is displayed;
- where consent-requiring technology is used, it remains blocked until a valid decision and a persistently accessible “Cookie Settings” control operates;
- the Hungarian master version and controlled English translation contain the same technical inventory.

14. REVIEW AND REAPPROVAL EVENTS

- introduction of a new cookie, localStorage key or other client-side storage;
- addition of analytics, marketing, social, embed, wallet, payment or CAPTCHA technology;
- change of hosting, CDN, DNS, WAF or security provider;
- change to the purpose, content, lifetime or activation method of language storage;
- introduction or replacement of a consent-management platform or banner;
- material change in a legal or regulatory requirement, guidance or technical interpretation.

15. SOURCES AND VERIFICATION BASIS

- SATIS Investment current static website codebase and controlled technical description;
- SATIS Investment Privacy Notice - controlled Hungarian document version;
- Directive 2002/58/EC of the European Parliament and of the Council, in particular Article 5(3) - EUR-Lex;
- European Data Protection Board Guidelines 2/2023 on the Technical Scope of Article 5(3) of the ePrivacy Directive, final version 2.0;
- Judgment of the Court of Justice of the European Union in Case C-673/17, Planet49;
- Current text of Act C of 2003 on Electronic Communications and relevant cookie guidance of the Hungarian National Authority for Data Protection and Freedom of Information (NAIH).

16. FINAL STATEMENT

The current approved and documented operation of the SATIS Investment website does not use marketing or visitor-analytics cookies. Following the visitor's own language selection, the language preference may be retained in browser localStorage under the key satisPreferredLanguage. The key is not used for advertising, profiling or visitor tracking; any material technical change requires renewed legal, compliance and technical review.

This Notice does not authorise any later tracker, embedding or consent-management mechanism. Any new technology requires a separate inventory, legal and compliance review, technical testing, document update and, where necessary, renewed four-area approval.
